IETM Bundling And Distribution Strategy

Challenge

- 2,843 IETMs issued on CD. Currently 1,652 IETMs in linked PDF loaded onto the JCALS website, with more added every day.
- IETMs are applicable to multiple ship classes and owned by various TMMAs.
- How to distribute to appropriate users.

What We Are Doing Now

- IETMs are bundled and distributed by project/ship class as funded.
- Update CD-ROMs are issued as funded.
- Linked PDF files loaded to JCALS website for download.
- Linked PDF files loaded to TMPODS for hardcopy printing via NAVICP.

CD-ROMs Issued

HM&E TMs

- AOE 6 Class
- CG 47 Class
- DD 963 Class
- DDG 51 Class
- FFG 7 Class
- MCM 1 Class
- MHC 51 Class

CD-ROMs Issued

Special Projects

- PC 1 POGs
- SSN 688 Towed Bouys
- LCAC Prop Engine
- Baseband Switch Operator's Handbook
- NSTM
- SSN 688 Ant. Systems
- Watertight Closures
- Gas Free Engineering
- PPMs for the CG 47, DDG51 and FFG 7 Classes

Steps We Use to Bundle and Distribute IETMs

- Use of TDMIS
  - Obtain CD-ROM volume ID
  - Maintain configuration

  Revision and change levels

  Ship applicability
  - Develop and maintain distribution lists
- Use of TEXCEL/Content@
- ATIS certification
- DAPS for duplication and distribution

IETM Bundling and Distribution

- Current
  - All SGML files reside in TEXCEL/Content@.
  - All TM modifications are done using the SGML source file.
  - TMs are published into linked PDF through XyVision Production Publisher.
  - NSWCCD coordinates with TMMAs to issue IETMs that reside in TEXCEL/Content@.

IETM Bundling and Distribution

- Near future:
  - Continue with our current plan to issue ship class CD-ROMs and special project CD-ROMs.
- Future (proposed distribution change):
  - Issue entire library of all converted TMs to entire fleet.
  - Issue update CD-ROMs every quarter.
  - Filters would be built in so ship only sees their IETMs.

IETM Bundling and Distribution
